

Delivering solutions to improve operational efficiency, employee safety & cost reduction

Teldio

RBX
+PLUS

Two-Way Radio Telephony

RBX is an advanced telephone interconnect specifically designed for radio users to make & receive phone calls directly on their MOTOTRBO™ radios. Radios can communicate seamlessly with phones while having similar functionality to cellular devices.

AMS

Alarm Management & Notification

AMS is an automated, intelligent alarm management and notification system which can dispatch messages to the right users instantly without the need for user intervention (dispatcher). Alarms are escalated until they are acknowledged, resolved & closed.

LW

Lone Worker

Periodically ping lone workers to verify their well-being. If an employee fails to respond to an Check-In message an alarm is automatically sent to the response group ensuring a rapid response.

MDN

Man Down Notifier

Surveilling the radio's motion sensor, MDN monitor workers to identify if they have suffered an accident by detecting a lack of movement, horizontal tilt or both.

EMAIL
GATEWAY

Email Gateway

Streamline workflow by giving mobile workers the ability to receive and respond to emails and work tickets on their radios. Integrating into third-party work management systems, productivity is increased.

TruFleet
AVL

Fleet Management & AVL Solution

Track and manage the status of mobile workers in real-time using a rich, intuitive, functional mapped display via a web browser on a desktop, tablet or mobile phone.

TDC

TruDispatch Console

From a Windows PC equipped with a microphone & headset dispatchers can make & receive calls with individuals or talkgroups, oversee network communication and playback audio.

WTS

Work Ticketing System

An all-in-one work ticket management system which allows you to seamlessly send and monitor work tickets to ensuring all issues are dealt with in a timely manner.

Gateway
Solutions

Teldio Gateway Solutions

The Teldio Gateway is a highly customizable platform offering custom and pre-configured solutions. It can be used to build a solution to fit a customers' exact need.

R2R

Radio to Radio Recording

Record, log and playback radio-to-radio conversations.
